

BALTIMORE EDUCATION INITIATIVES

CREATING LEADERS. REDUCING POVERTY.

NATIONAL SUPPORT OUTREACH

Current stage: Baltimore Education Initiatives Inc. is a newly established, pre-operational nonprofit organization. It is completing its foundational development, building public awareness, establishing leadership and partnerships, and awaiting federal recognition of its tax-exempt status.

Baltimore Education Initiatives is developing an ambitious 20-year initiative built around twelve consecutive years of comprehensive education - from Grade 1 through Grade 12 - for children from Baltimore families facing poverty.

As part of this early development stage, Baltimore Education Initiatives has begun reaching out to individuals whose experience, leadership, and public service may help strengthen the Initiative.

Personalized letters have been sent to former presidents, former United States secretaries of education, educators, researchers, philanthropic leaders, business leaders, and others whose work relates to education, opportunity, economic mobility, and reducing generational poverty.

Through these letters, Baltimore Education Initiatives has requested thoughtful review, professional guidance, introductions, and support in transforming this carefully developed vision into an operational institution capable of serving Baltimore's children for generations.

We are currently awaiting responses. We will update this publication as Baltimore Education Initiatives receives support.
